Five worlds. Three levels.

15 colorful books • 360 book pages • 240 fresh activity pages

AGES
4–5

Tiny Thinkers

Large pictures, small counts, matching, simple routes, and playful drawing. A grown-up reads the directions.

AGES
6–8

Puzzle Explorers

Patterns, picture numbers, codes, grids, memory, and simple logic. Room to circle, draw, and work things out.

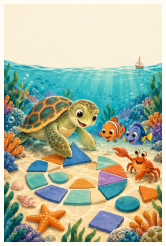

AGES
9–11

Brain Adventurers

Multi-step logic, spatial reasoning, number rules, paths, fractions, and data. Space to plan and check a solution.

Garden

Ocean

Space

Safari

Carnival

Your five themed sets

Every set contains one book for each of the three age groups.

SET 01

Garden Discoveries

Leaf green • warm coral • sunflower

SET 02

Ocean Adventures

Sea blue • ocean teal • coral orange

SET 03

Space Quest

Indigo • violet • bright lime

SET 04

Safari Trails

Warm ochre • leafy jade • terracotta

SET 05

Rainbow Carnival

Berry pink • turquoise • golden yellow

Choose a comfortable start

Age bands guide difficulty. Children can revisit a level or try another.

AGES 4–5

- Recognize pictures and shapes
- Count small groups
- Compare sizes and quantities
- Match, sort, and notice details

AGES 6–8

- Follow a repeating rule
- Connect pictures and numbers
- Read simple charts and codes
- Use position and logic clues

AGES 9–11

- Combine more than one clue
- Plan routes and count paths
- Reason with numbers and parts
- Check a multi-step solution

Inside every 24-page book

Pages 1–2	Cover and welcome
Pages 3–18	16 activity pages
Pages 19–22	Answers and little clues
Page 23	Puzzle Power certificate
Page 24	Back cover

Simple ways to use the books

A pencil, a comfortable space, and curiosity are enough.

1

Read and look together

For the youngest group, read each direction aloud. Point to pictures and invite your child to describe what they notice.

2

Give thinking time

Let children test a rule, change an answer, or leave a page for another day. The books have no timer.

3

Check with a little clue

Use the answer cards on pages 19–22. Spatial puzzles include small solution pictures where helpful. Drawing answers can vary.

4

Talk about the method

Ask “How did you work it out?” A drawing, a count, or a short explanation can reveal a useful strategy.

5

Print the pages you need

Use A4 portrait in color at actual size. On Letter paper choose Fit. To print only activities, select pages 3–18 of a book.

From reference ideas to new puzzles

The collection uses fresh questions, arrangements, diagrams, and illustrations.

Visual patterns and grids

The Complete Book of Intelligence Tests; Test Your IQ; More IQ Testing; intelligence-quotient-test.pdf. Inspired formats include sequences, missing figures, picture changes, and rotations.

Memory and observation

The Cambridge Self-Scoring I.Q. Test and The Complete Book of Intelligence Tests. Adapted into short picture-memory tasks and observation games.

Routes, positions, and balance

The Ultimate IQ Test Book; Test and Assess Your IQ; More IQ Testing. Adult formats were simplified into clear paths, regions, and equal-arm picture balances.

Numbers and data

The supplied mathematics samples, school worksheets, and scoring guide informed small-count charts, ordering, grouping, and age-appropriate number reasoning.

Learning-friendly presentation

Learning and Memory – The Brain in Action informed short chunks, visual organization, and opportunities to explain a solution together.

These are practice and play books. They do not produce an IQ score or a diagnosis. Every fixed-answer activity was checked; open-ended drawing answers are identified in the keys.
